The 7A-FE firing order is 1-3-4-2. Apart from the 7A engines, they also produced younger 4A and 5A motors. The 7AFE is equipped with a toothed timing belt. The car needs a belt replacement every 60,000 miles (100,000 km) of mileage. In 1998, a new 1ZZ engine replaced the 7A-FE. It will be mentioned later.

“Single-coil” humbucker wiring: both coils connected in parallel. This option gives you a single-coil-like tone, but still retains hum-cancelling capability. It doesn't deliver a crystal-clear Strat or Tele tone, but to my ears it at least resembles a single-coil pickup—maybe closer to a P-90 than to a standard single-coil.

The 4A engine series was a 1587 cc (1.6 liter) engine, introduced in 1988, and revised to 4A-FE in 1993; it was mainly used in the Corolla, and was replaced by the ZZ series in the 1998s. The 7A engine series was essentially the same engine, stroked for higher displacement (1.8 liters) and better torque.

I ended up getting a old original coil and installed new plug wires because I never trusted the V twin coils. My first one failed due to water getting into one plug wire connector and turning the inside green. Next one seemed to be hard on plugs. The V twin coils have a rubber Ferrel to keep water out.

Look at the top of the coil closely by the 2 small terminals there will be plus and minus signs. The plus sign is where the hot wires go. Go turn on the ignition switch, with a volt meter find the wire with power, it goes to the plus side of the coil. The negative side of the coil goes to the distributor.
